### Introducing Dutchman's new Pot Clamp

A newly designed attachment that can easily mount to your loader, the Pot Clamp takes all the stress out of your loading/unloading and relocating work. Designed to gently clamp containers but provide maximum surface contact, the standard design can move containers from 15 gallon to 65 gallon but interchangeable arms can be made for larger container sizes. The Clamp simply connects to your loader's 2-way hydraulics for easy operation. The Dutchman Pot Clamp: built with the same durability and longevity you have come to know from Dutchman Industries Inc.
